LED-PANEL

The LED panel size is 384mm x 384mm.
They are equipped with 4096 individually controllable RGP LEDs.
The screens are outdoor usable and robust due to a high quality stainless steel housing.
They are controlled by a radio signal (2.4 GHz), which does not require any cabling.
Only normal mains power is required.

384mm x 384mm

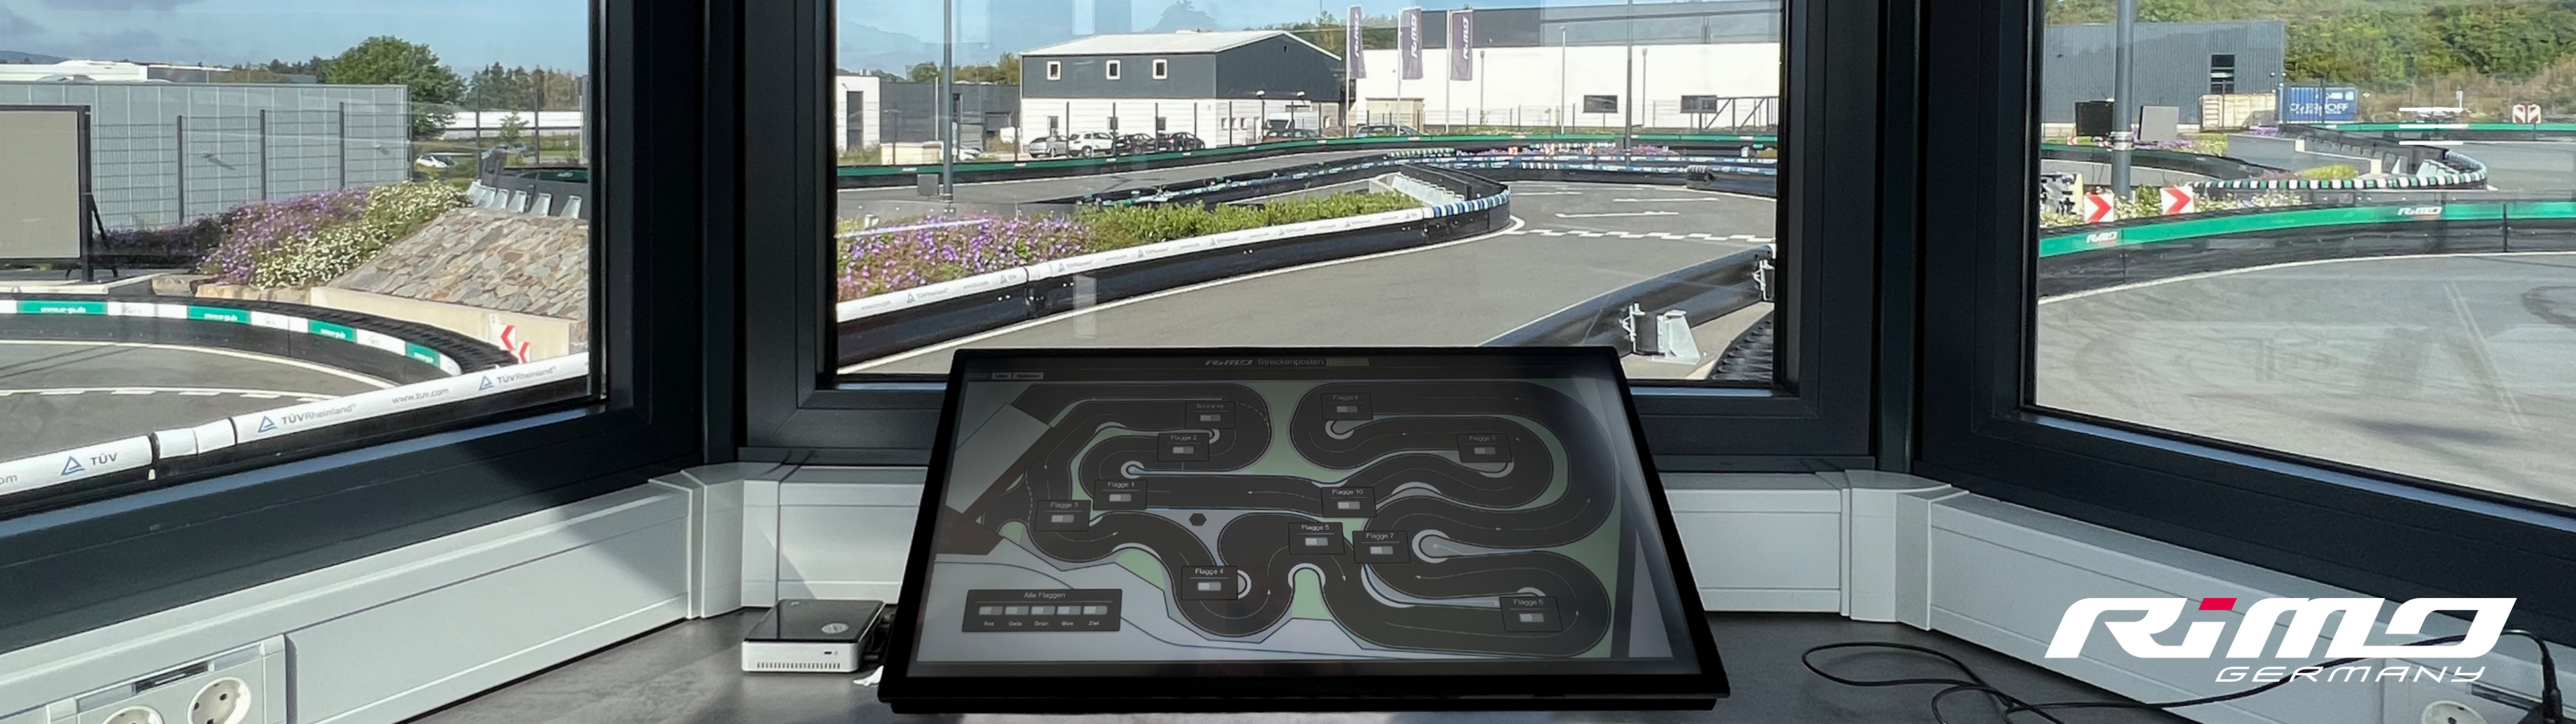

THE ENTIRE SYSTEM

Display

Clear digital track view with freely positionable flag icons. Standard possible flag colors: red, yellow, green, blue, finish flag. On request all other colors and patterns are possible. Each flag can be switched blue individually. This is programmed with adjustable time interval.

Control unit

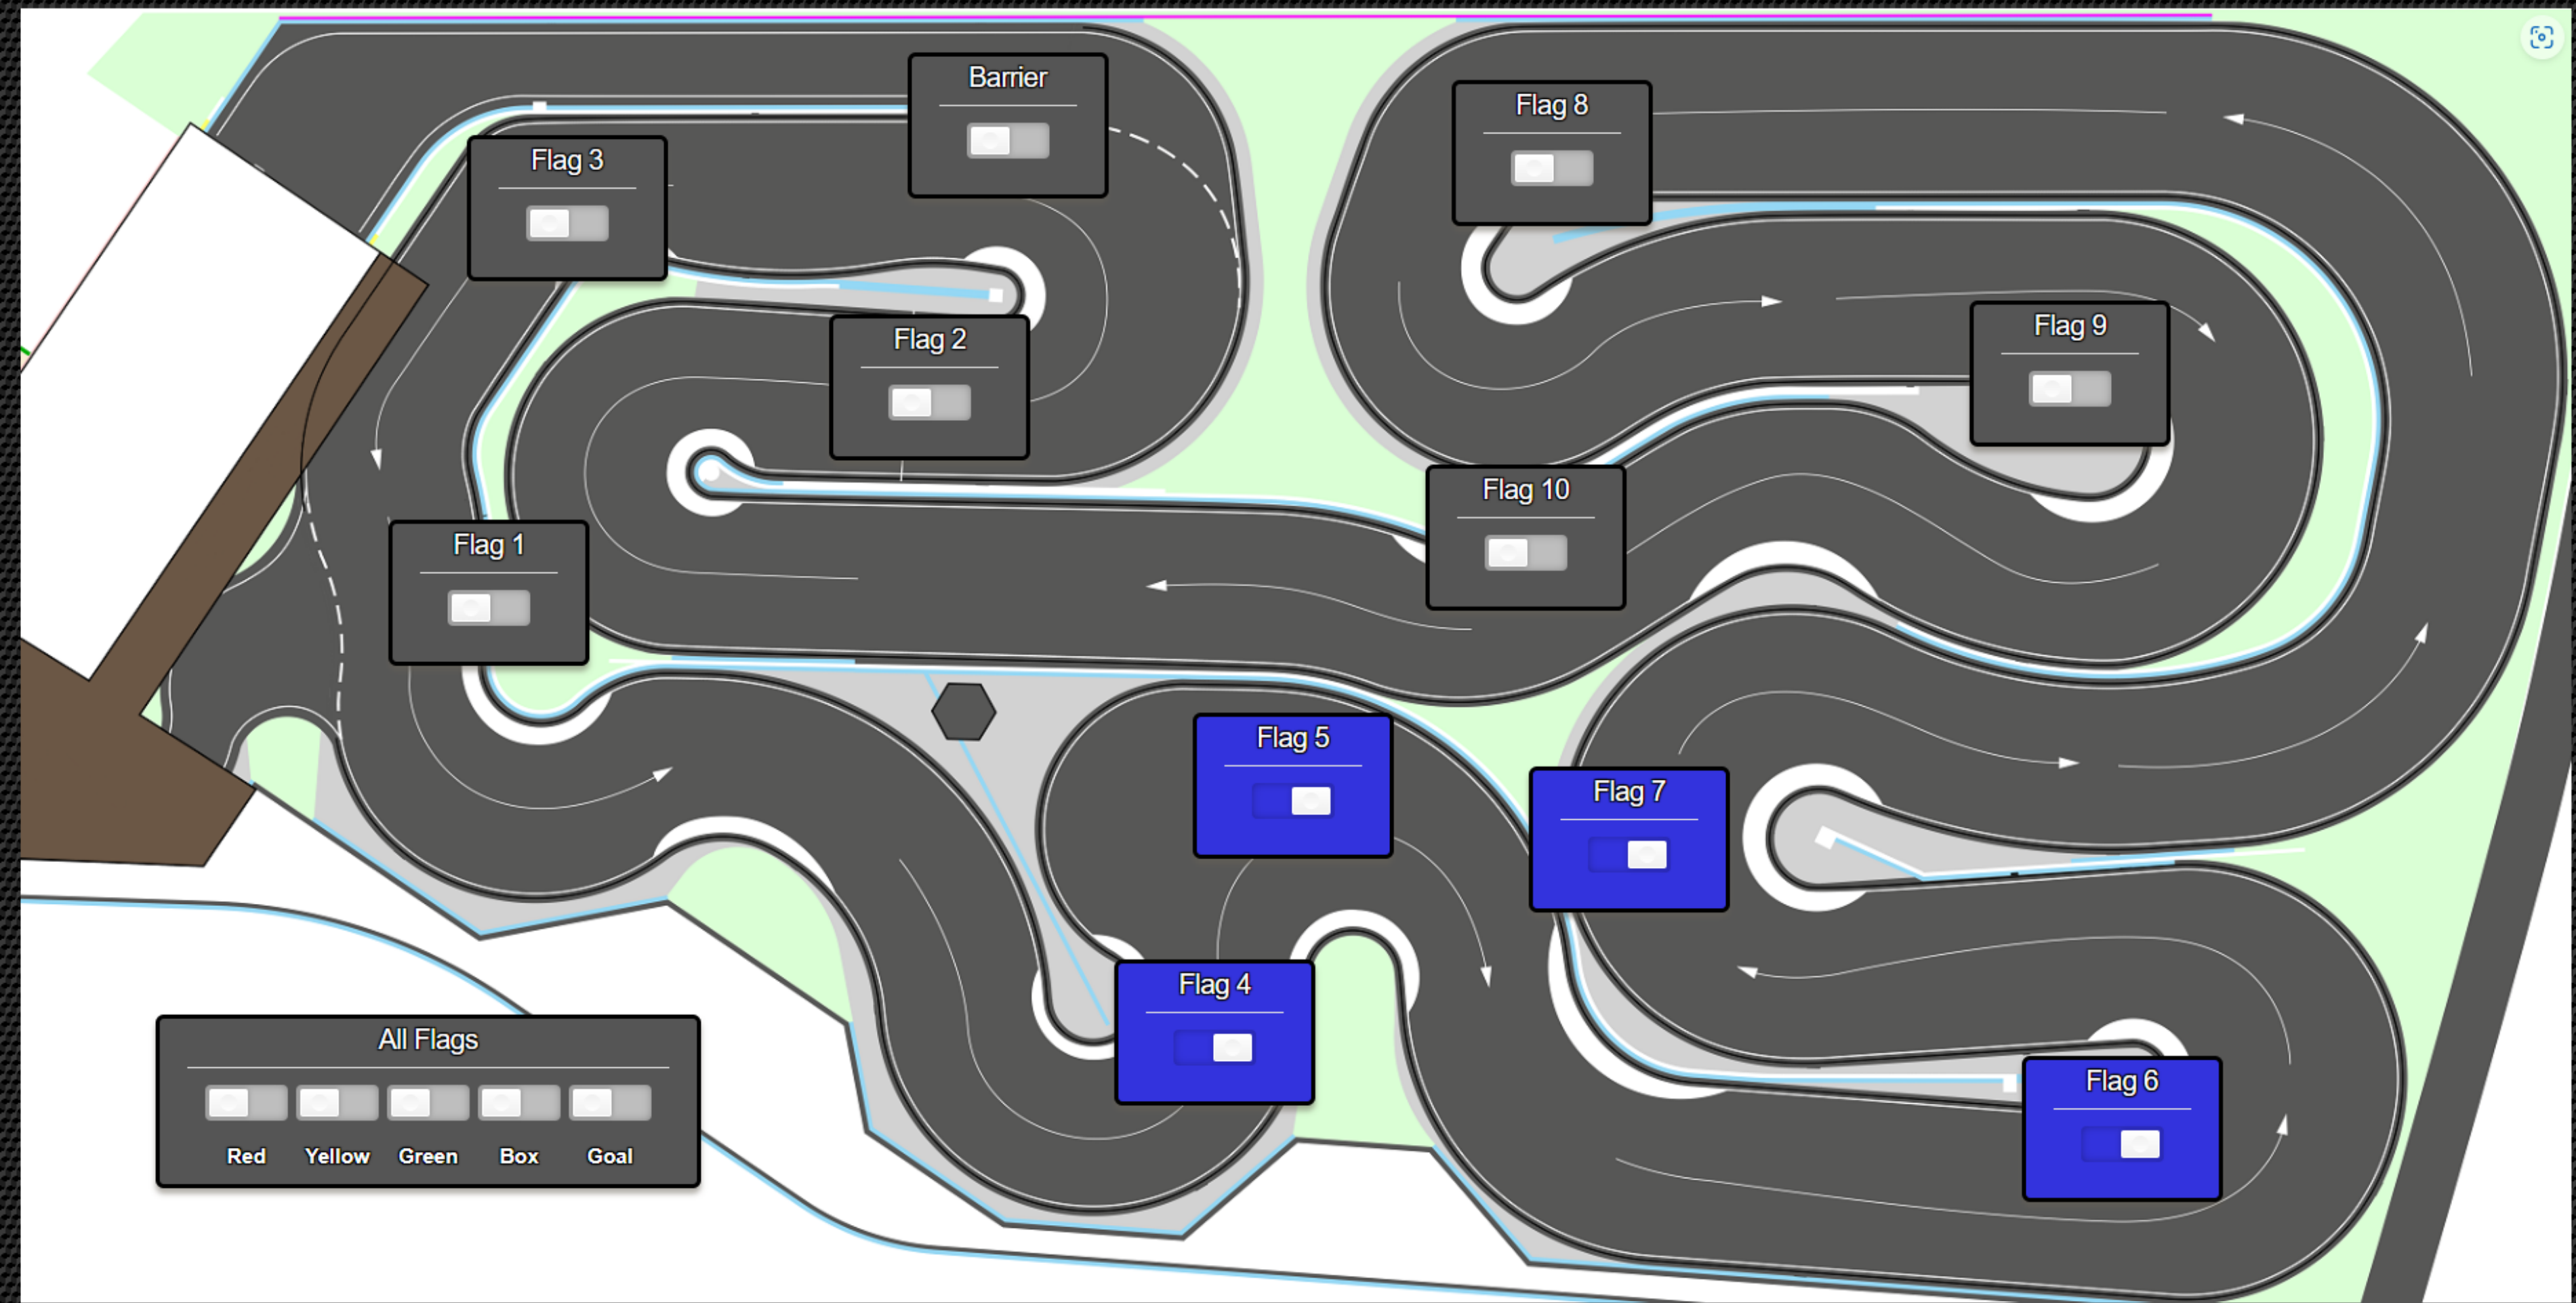

Easy implementation due to independence from existing networks. Control via any WLAN and web browser capable end device possible.

CONTROL

TRACK CONTROL

Simple and direct operation is possible through our large clear touchpad. Through all components a fast and accurate transmission to the monitors is ensured. Operation via the individual route layout or via the list possible. No internet connection is necessary.
