- Programmable LED lights
- Horn
- Maintenance-free drive
- Lithium battery
- Coin slot
- Driving direction switch
- Long product life through quality construction

3+

SINUS NANO

Especially designed for the youngsters.

The special ergonomics of small children has been considered and tested from the beginning of our development. Maximum safety for the first driving experience has been a major goal for us.

We installed the rotating tires out of unintentional contact and added an ergonomic and sporty steering wheel.

The SINUS NANO can be autonomously operated even on smaller areas, indoor as outdoor. The very small turning radius and the incredibly easy steering make it possible.

The battery capacity allows operation for a complete day without the need of recharging. When it comes to charging you can choose between changing the battery or charge by direct connection to the charger plug on the battery.

What could be more fun than being able to drive mummy or daddy around, knowing that they can take over the control if necessary?

LED lights with Lightshow

Big LED front and back lights in driving mode alternate with an attention arousing lightshow while waiting for customers.

SINUS NANO

Features:

3m turning circle
LED Lightshow

Engines:

2x Brushless DC
Maintenance free

Removable battery:

Type: LiFePO4 1,73kWh
Capacity: 45Ah
Voltage: 38,4V
Charging time: 2 Std.
Driving time: ~9 Std.

Dimensions an weight:

L/W/H 1500mm / 900mm / 550mm
Weight: 129kg
